

```
#rpm -ivh vsftpd-3.0.3-28.el8.x86_64.rpm -> to install the package  
#rpm -q vsftpd -> to query the package  
#rpm -qa -> to query all  
#rpm -ql vsftpd -> query list  
#rpm -qd vsftpd -> query doc  
#rpm -qc vsftpd -> to query config files  
#rpm -qi vsftpd -> query info  
#rpm -Uvh vsftpd-3.0.3-28.el8.x86_64.rpm -> to update the package  
#rpm -e vsftpd -> to uninstall the package  
Yum -> yellow dog update and modify  
To create a local yum repos
```

```
#vim /etc/yum.repos.d/rhel.repo
```

```
[rhel8_BaseOS]  
name=rhel8_BaseOS  
baseurl=file:///run/media/student/RHEL-8-0-BaseOS-x86_64/BaseO  
S enabled=1  
gpgcheck=0
```

```
[rhel8_AppStream]  
name=rhel8_AppStream  
baseurl=file:///run/media/student/RHEL-8-0-BaseOS-x86_64/AppStrea  
m enabled=1
```

```
gpgcheck=0  
:wq  
#yum install httpd* -> to install the packages
```

```
#yum list httpd -> to query the package
```

```
#yum info httpd -> to know the info
```

```
#yum update httpd* -> to update the package
```

```
#yum grouplist -> to list the groups
```

```
#yum groupinstall "<<group name>>" -y
```

```
#yum deplist httpd -> to know the dependency
```

```
#yum repolist all -> to check the repos
```

```
#yum clean all -> clean the yum cache
```

```
#yum remove httpd* -y to uninstall the package
```
